ABSTRACT

This report presents data on food consumption for the year 1977-78 with seasonal variations gathered by a survey of 14,023 households across the United States. As a part of an on-going effort by the Department of Agriculture, the report provides statistical information on American food habits, the kinds and quantities of food people eat, and the money value of that food. Dietary levels of household food are determined by calculating the nutrient content of the food reported and by comparing the results to recommended amounts of nutrients for persons of the sex and age of those eating in the household. Data are provided on the weekly household food consumption of more than 400 food groups and items for the year, April 1977 through March 1978, and for each of the four seasons contained in that period--spring, summer, and fall of 1977, and winter of 1978. Information includes quantity and money value of foods, and the percentage of households using those foods during the week. (JD)

Trade names are used in this report solely for the purpose of providing specific information. Mention of a trade name does not constitute a guarantee or warranty of the products by the U.S. Department of Agriculture or an endorsement by the Department over other products not mentioned.

Data collection in the Nationwide Food Consumption Survey 1977-78 was completed in March 1978. This survey is the only source of national information on household consumption of food, by quantity and money value, since the last survey was conducted in 1965-66. The results are still valid and will continue to be used in coming years in the consideration of many issues including food consumption and nutrition education.

ACKNOWLEDGMENTS

The Nationwide Food Consumption Survey 1977-78 was conducted by the Consumer Nutrition Division, Human Nutrition Information Service (formerly Human Nutrition, Science and Education Administration), U.S. Department of Agriculture. The sample was designed and the data were collected and processed by National Analysts, Inc., under contract with the Division. The data for this publication were tabulated by the Federal Prison Industries, U.S. Department of Justice, also under contract with the Division.

Work on the survey and publication was the concern of many individuals in the Consumer Nutrition Division. Robert B. Reese had overall responsibility for planning and supervising the survey. Mary Y. Hama supervised a team composed of Dorothy A. Baker, Kim M. Hatfield, Linda W. Ingwersen, Lorraine R. McCullen, and Constance D. Ward that developed plans for coding and tabulating the collected household food consumption data, analyzed findings, and wrote this report. Brucy C. Gray, Jan L. Janiczek, and Mills B. Weinstein monitored the data processing and tabulation performed by the contractor. Betty B. Peterkin, Frank N. Hepburn, and the Nutrient Data Research Branch provided assistance at different phases of the survey planning and analysis. Ellen W. Caswell and Mildred T. Pati provided assistance in matters relating to word processing. Johna L. Pierce provided editorial and production assistance.

During the planning of the survey, special attention was given to the needs of potential users, particularly the Economic Research Service and Food and Nutrition Service of USDA, Food and Drug Administration and Social Security Administration of the Department of Health and Human Services, and other Federal agencies.

The study was carried out under the general direction of Robert L. Rizek, Director of the Consumer Nutrition Division, Human Nutrition Information Service.

Food Consumption: Households in the United States, Seasons and Year 1977-78

by the Consumer Nutrition Division
Human Nutrition Information Service

HIGHLIGHTS

The money value of food used by 14,023 housekeeping households in the United States averaged $61 in a week during the survey year, April 1977 through March 1978. Of this amount, slightly more than three-fourths ($47) was the value of food used at home and nearly one-fourth ($14) was the expense for meals and snacks eaten away from home. Most of the food used at home was bought, except for $3 worth that was received without direct expense. The allocation of the household food dollar was as follows:

Item	Dollars	Percent
All food..............................	60.62	100.0
Money value of food used at home..	46.91	77.4
Bought..........................	43.44	71.7
Received without direct expense.	3.47	5.7
Home-produced.................	1.95	3.2
Received as gift or pay.......	1.51	2.5
Expense for meals and snacks eaten away from home..................	13.71	22.6

These figures include the money value of all items commonly thought of as food and also alcoholic beverages. Food received without direct expense was valued at the average price per pound paid for comparable food by survey households in the same region and season.

The household size for the year averaged 2.76 in terms of 21-meal-at-home-equivalent persons (see "Definitions and Explanations," Household Size) and was slightly larger in the summer (2.83 persons) than in any other season. The money value of food at home per person increased only slightly in successive seasons, from $16.71 in the spring to $17.40 in the winter--an increase of 4.1 percent.

During the period of the Nationwide Food Consumption Survey (NFCS), prices for food at home increased. They rose by 4.9 percent between 1977 quarter II (April-June) and 1978 quarter I (January-March), as measured by the Consumer Price Index (CPI), Bureau of Labor Statistics, Department of Labor. The prices of major food groups increased by varying percentages: meat--9.3, sugar and sweets--8.0, fish--7.6, cereals and bakery products--5.6, fats and oils--5.3, eggs--3.5, dairy products--3.3, nonalcoholic beverages--2.4, poultry--2.2, and vegetables and fruit--1.1. Following completion of the NFCS, food prices continued to rise, but at a faster rate than before.

According to data from the NFCS, the largest seasonal variation in the money value of food used by households was found in home-produced food. This value in the summer averaged one-third greater than for the year. Home-produced food contributed the most to the money value of home food in the summer, $2.58, and least in the winter, $1.49--representing 5 and 3 percent of the value of all home food, respectively. The use of some home-produced food during the survey week was reported by 42 percent of the households in the summer and 30 percent in the winter.

In each season, more than one-third of the home food dollar (value of purchased and nonpurchased food used) was spent on meat, poultry, fish, and eggs. Another one-third of the home food dollar was divided almost evenly among milk, cream, and cheese; grain products; and beverages. The money allocated to fresh vegetables, fresh fruit, and commercially processed vegetables and fruit changed somewhat with the season. For other major food groups, the division of the food dollar varied little or not at all with the season, as shown by the following percentages:

	Spring	Summer	Fall	Winter
Meat, poultry, fish, eggs......	36	35	36	36
Milk, cream, cheese............	12	12	12	12
Grain products.................	11	11	11	12
Fresh vegetables (not potatoes)................	6	8	6	5
Fresh fruit....................	5	6	4	4
Commercially processed vegetables and fruit.........	4	3	4	5
Potatoes, sweetpotatoes (fresh and processed)........	2	2	2	2
Fats, oils.....................	3	3	3	3
Beverages......................	11	11	11	11
Other (sugar, sweets, juices, soup, mixtures, nuts, etc.)..	10	9	11	10
Total.........................	100	100	100	100

Quantities of some major food groups used by households varied substantially with the season. Fresh vegetable and fresh fruit consumption changed most dramatically (see table 25--Seasonal indexes of consumption for the United States). The amount of seasonal fluctuation during the year was similar for fresh vegetables and for fresh fruit--ranging by more than 50 percentage points--and use of both groups in the summer exceeded the average for the year by slightly more than 35 percent. Selected items from these two groups are shown with their seasonal high and low quantities used per household as follows:

	High		Low		Ratio: high/low
	Season	Quantity (Pounds)	Season	Quantity (Pounds)	
Carrots.......	Winter	0.50	Spring	0.38	1.3
Corn..........	Summer	1.47	Winter	.17	8.6
Cucumbers.....	Summer	.78	Winter	.17	4.6
Dark green, leafy.......	Fall	.38	Summer, Winter	.25	1.5
Lettuce.......	Summer	1.30	Fall	1.08	1.2
Onions........	Winter	.57	Spring	.39	1.5
Peas..........	Summer	.18	Winter	.07	2.6
Peppers.......	Summer	.26	Spring, Winter	.14	1.9
Potatoes......	Winter	3.69	Spring	3.11	1.2
Pumpkin, winter squash..	Fall	.36	Spring	.06	6.0
Snap, wax beans.......	Summer	.54	Winter	.29	1.9
Tomatoes......	Summer	2.04	Winter	.75	2.7
Apples........	Fall	2.39	Spring	1.14	2.1
Bananas.......	Fall	1.30	Spring	1.21	1.1
Cantaloup.....	Summer	1.80	Winter	.03	60.0
Grapefruit....	Winter	1.21	Summer	.23	5.3
Grapes........	Summer	.33	Winter	.06	5.5
Melons except cantaloup...	Summer	2.82	Winter	.02	141.0
Oranges.......	Winter	1.65	Summer	.62	2.7
Peaches.......	Summer	1.01	Winter	.07	14.4
Pears.........	Fall	.29	Spring	.11	2.6
Plums.........	Summer	.29	Winter	.01	29.0
Strawberries..	Spring	.32	Fall	.04	8.0

Although the consumption of fresh vegetables and fruit peaked in the summer, not all items within each group were at their highest use during this time. For example, tomatoes, corn, and cucumbers reached their maximum use in the summer, but dark-green leafy vegetables as well as pumpkin and winter squash peaked in the fall.

Many fruits, including peaches, grapes, cantaloup, and other melons, were consumed in greatest quantities in the summer. Strawberries were used most in the spring, apples in the fall, and oranges and grapefruit in the winter.

As expected, the seasonal variation in household use of commercially canned as well as frozen vegetables and fruit appeared counter to the seasonal use of the fresh vegetable and fruit group. Consumption of these commercially processed groups was highest in the winter and lowest in the summer.

Seasonal changes were evident for other major food groups but not to the same extent as for vegetables and fruit. The use of meat showed some seasonal variation, although the difference was small--slightly more in the spring and less in the fall and winter. Within the meat group, the household consumption of beef was about one-third of a pound greater per week in the spring than in the fall or winter. Pork consumption was highest in the spring and lowest in the summer.

Household use of poultry peaked in the fall, reflecting the consumption of turkey during the holiday season. Overall use of the fish and shellfish group in the spring surpassed the average for the year by 10 percent. This may be attributable to the greater use of fish in this season--one-fourth of a pound more per week than the amount used in the winter. In contrast, shellfish was most popular in the fall. Egg consumption varied only slightly among the seasons.

Relatively little seasonal change was observed in the consumption of the remaining major food groups. Some selected items within the groups, however, exhibited strong seasonal variation. For example, although the seasonal consumption of milk and milk products as a whole differed by only 2 percent, consumption of processed milk was 20 percent higher in the winter than in the summer. Ice cream consumption changed 34 percent between these seasons, with about 2 pints consumed in a week by households in the summer and 1-1/2 pints in the winter. The use of salad dressing was highest in the summer and lowest in the fall and winter, reflecting a pattern similar to the use of fresh vegetables such as lettuce. Soft drinks were consumed most in the summer and least in the winter. Conversely, the usage of coffee showed a seasonal high in the winter and a low in the summer.

Seasonal Differences by Urbanization

Average consumption of major food groups showed the most season-to-season variability in nonmetropolitan households, followed by central city and suburban households. Compared with those in other urbanizations, nonmetropolitan households shifted more notably in the use of fresh vegetables, commercially canned vegetables and fruit, and fish and shellfish. Consumption of fresh vegetables by nonmetropolitan households in the summer was 45 percent above their annual average. Interestingly, about 50 percent of these households reported using some home-produced fresh vegetables (including home-canned and -frozen vegetables that were home-produced) in the summer and 36 percent did in the winter. Although their consumption of fresh fruit fluctuated less with season than it did in other urbanizations, citrus fruit proved to be a notable exception with winter consumption exceeding the annual average by 83 percent. As expected, commercially processed vegetables and fruit were used in larger quantities in the winter than in any other season.

In nonmetropolitan households, the use of fish and shellfish varied to a greater degree from season to season than it did in other urbanizations. Consumption was highest in the spring and lowest in the winter. The seasonal extremes were reversed for milk and milk products as well as for fats and oils. More bakery products were consumed in the winter than in the other three seasons.

Central city households had notable seasonal shifts for fresh fruit as well as for potatoes and sweetpotatoes. Average fresh fruit consumption in the summer was 41 percent above their annual average--a difference of over 3 pounds per household in a week. Consumption of potatoes and sweetpotatoes was roughly 10 percent above the annual average in the winter and the same percent below in the summer.

Suburban households had greater seasonal shifts in meat consumption than those in the other two urbanizations. In the spring, the quantity of meat used by suburban households was almost 10 percent above the annual average--or nearly 1 pound more in a week.

Seasonal variation for flour and cereal products as well as for eggs was fractionally greater among suburban than other households. Less seasonal change was indicated by households in the suburbs than by those in other urbanizations for milk and milk products, fats and oils, bakery products, and potatoes and sweetpotatoes. Quantitatively, however, suburban households' consumption of milk and milk products per week in the spring was 3 quarts more (in terms of calcium equivalent) than that of central city households in the same season.

Household sizes for the year were 2.86, 2.82, and 2.59 equivalent persons for the suburbs, nonmetropolitan areas, and central cities, respectively. Average size was fractionally higher in the spring for suburban households and in the summer for nonmetropolitan and central city households.

Households in the three urbanizations varied little from season to season in their allocation of the home food dollar for the various food groups. Exceptions were the fresh vegetable group and the meat, poultry, fish, and egg group. Nonmetropolitan households devoted nearly twice as much of their food dollar to fresh vegetables in the summer (9 percent) as in the winter (5 percent). Slightly more of the food dollar in central city households went for meat, poultry, fish, and eggs in the fall and winter (39 percent) than in the summer (36 percent). The shares allotted to potatoes and sweetpotatoes and to fats and oils were relatively constant for each urbanization and each season. Seasonal variation for the other major food groups was nominal.

The shares of the home food dollar (value of purchased and nonpurchased food used) for selected food groups by season for each urbanization are displayed by the following percentages:

Food group by urbanization	Spring	Summer	Fall	Winter
Meat, poultry, fish, eggs:				
Central city................	38	36	39	39
Suburban....................	36	34	35	35
Nonmetropolitan............	36	34	35	35
Milk, cream, cheese:				
Central city................	11	12	12	11
Suburban....................	12	13	13	12
Nonmetropolitan............	12	12	13	13
Grain products:				
Central city................	11	11	11	11
Suburban....................	11	11	12	12
Nonmetropolitan............	11	11	11	12
Fresh vegetables (excluding potatoes):				
Central city................	6	7	5	5
Suburban....................	6	7	5	5
Nonmetropolitan............	7	9	6	5
Fresh fruit:				
Central city................	5	6	4	4
Suburban....................	5	6	4	4
Nonmetropolitan............	4	5	4	4

Food group by urbanization	Spring	Summer	Fall	Winter
Commercially processed vegetables and fruit (canned, frozen, dried):				
Central city................	4	4	4	5
Suburban....................	4	3	4	4
Nonmetropolitan............	4	3	4	5
Potatoes, sweetpotatoes (fresh and processed):				
Central city................	2	2	2	2

Nonmetropolitan............	11	11	11	10
Other (sugar, sweets, juices, soup, mixtures, nuts, condiments, etc.):				
Central city................	9	8	10	10
Suburban....................	9	9	11	11
Nonmetropolitan............	10	10	11	11

Seasonal Differences by Income

At higher levels of income, household size was generally larger and the money value of food at home and the expense for food away from home were greater.

	Income before taxes		
	Under $5,000	$10,000-$14,999	$20,000 and over
		Dollars	
Money value of food at home:			
Year	29.71	47.98	59.22
Spring	30.29	45.45	60.04
Summer	30.51	50.50	60.15
Fall	29.49	47.11	59.07
Winter	28.41	49.03	57.63
Expense for food away from home:			
Year	3.75	13.07	24.90
Spring	5.08	13.97	25.04
Summer	3.79	13.06	26.47
Fall	3.18	12.11	23.94
Winter	2.80	13.07	24.17
Household size, year	(1.91)	(2.93)	(3.15)

In each season, households with high incomes ($20,000 and over) used food at home worth about twice as much as those with low incomes (under $5,000). A greater disparity was displayed by high- and low-income households in the average expense for food away from home. Differences in expenditures ranged from 5 times as much spent by high- as by low-income households in the spring to 8-1/2 times as much in the winter. These differences were related to a continuing drop in average expenditures incurred by low-income households for food away from home--from $5.08 per week in the spring to $2.80 in the winter.

On a per-person basis, the use of milk and milk products, bakery products, fresh fruit, and beverages averaged more at successively higher income levels for each season. In contrast, the use of flour and cereal products, eggs, commercially canned vegetables, and dried vegetables including beans was generally lower at higher levels of household income.

The data by income levels indicate that seasonal variations in the consumption of vegetables and fruit were consistent across the income scale. Although some differences in the consumption of other food groups were observed among income levels, no particular level experienced more seasonality than another.

Seasonal Differences by Region

Regardless of the season, the money values of food at home per household and per person were lowest in the South and highest in the Northeast. Similarly, the expense for food bought and eaten away from home was lowest in the South and generally highest in the Northeast. The exception was in the winter when western households spent more than other households on food away from home.

For each region, household size differed somewhat with the season. For example, household size in the Northeast was 2.86 persons in the summer and 2.71 persons in the fall. In contrast, households in the West averaged 2.79 persons in the spring and 2.57 persons in the winter--a difference of 0.22 person or an equivalent of nearly 5 meals from the home food supply during the week.

Food consumption by regions generally followed a consistent pattern, reflecting seasonal availability of food, such as shifts from processed vegetables and fruit in the winter to fresh produce in the summer. Considerable variability was found among the seasons in the consumption of fresh vegetables in the North Central region and of fresh fruit in the South. However, food groups shifted more with the season among households in the West than among those in the other regions. These western households varied widely in their seasonal consumption of such foods as milk, cream, and cheese; flour and cereal products; bakery products; meat; poultry; sugar and sweets; potatoes and sweetpotatoes; commercially canned vegetables and fruit; and dried vegetables and fruit. Food consumption information by seasons and year is available for the four regions--Northeast, North Central, South, and West--in Reports No. H-7 through H-10.

INTRODUCTION

This report presents data for the seasons and the year from the household portion of the Nationwide Food Consumption Survey 1977-78 (NFCS), conducted by the U.S. Department of Agriculture (USDA) from April 1977 through March 1978. The study is part of USDA's continuing research program on human food and nutrition that was started at the turn of the century. Through the years, the Department has contributed much to the knowledge of American food habits by collecting information about the kinds and quantities of food people eat as well as the money value of that food. Also, dietary levels of household food are determined by calculating the nutrient content of the food reported and by comparing the results to recommended amounts of nutrients for persons of the sex and age of those eating in the household.

Objectives of the USDA food consumption surveys have been expanded to serve new and diverse needs for information relating to consumers and the food they eat.

- Congress, the Department of Agriculture, and other Federal agencies use these data to develop and administer public programs and policies that relate to production, marketing, and consumption of food.

- Research and development laboratories, food manufacturers, and food industries use these data to adjust the producing, processing, and marketing of food closer to the needs and wants of consumers.

- Nutritionists, home economists, educators, and social workers use these data to assess the current nutritive value of diets of the population in the four seasons and to develop guidelines and programs for improving dietary levels in the United States.

Early fledgling studies of household food consumption were small-scale, intensive investigations and sometimes involved relatively few respondents. Since the 1930's, however, the Department has conducted six household food consumption surveys on a national scale: 1936, 1942, 1948 (urban only), 1955, 1965-66, and 1977-78.

Most of the household surveys before 1965-66 were conducted during the spring quarter of the year. The 1965-66 survey was expanded to include all four seasons. Information was obtained from about 7,500 sample households in the spring and about 2,500 households in each of the three subsequent quarters to provide indicators of seasonal consumption patterns. The 1977-78 survey was carried out over 12 months, with approximately 3,750 sample households surveyed during each 3-month period. The study aimed to provide measures of seasonality in food consumption with validity not previously attained.

In addition to household food consumption, some members of the sample households reported their intake of food and beverages for a day in the spring of 1965. This was the first national survey of food intakes of individuals to be undertaken. In 1977-78, the individual food intake phase of the study was expanded to cover the entire year, and intakes were obtained for 3-day periods.

In the NFCS 1977-78, a stratified probability sample of households was surveyed from April 1977 through March 1978. Households were selected to represent the universe of households in each of four Census regions and three urbanizations during each of the four seasons. The information was collected from about 15,000 households in the 48 conterminous States and about 36,000 individuals from these households. In addition, 5 supplemental surveys yielded information for about 5,000 households in which at least 1 member was older than 64 years of age, about 4,700 households with members participating or eligible to participate in the Food Stamp Program, 3,100 households in Puerto Rico, 1,100 urban households in Alaska, and 1,250 households in Hawaii. All of these supplemental surveys provide data on household food consumption and individual food intakes.

The data on food used in a surveyed household were collected in an interview with the person identified as most responsible for food planning and preparation. Trained interviewers, who used an aided-recall questionnaire, recorded the kind (such as ground beef and skim milk), the form (such as fresh, commercially canned, or

21

frozen), the quantity, and the cost, if purchased, of each food or beverage used in the household during the 7 days before the interview. Respondents also gave information on home food production and preservation, the number of meals eaten at home and away by household members, and meals and snacks eaten by guests. For use in classification, respondents provided other data, such as income, participation in food programs, age, education, and employment of the male and female head of household (see table 27--Selected household characteristics by season and urbanization, United States).

The methodology used to obtain household food consumption in the NFCS 1977-78 was the same as that used in the 1965-66 survey, with few exceptions. In 1965-66, the households were interviewed at the initial contact, but in 1977-78, households were contacted at least 7 days prior to the interview and asked to keep grocery receipts, shopping lists, menus, package labels, or other aids to help them recall the food used in the 7-day period. Both surveys measured food consumption at the level at which the foods came into the kitchen. Thus, the data should be interpreted as consumption in an economic rather than a physiological context.

After data collection in 1977-78, priority was given to preparing computer tapes for release to the public. Beginning in 1980, computer tapes presenting food and nutrient consumption of households and food and nutrient intakes of individual household members have been made available for distribution through the Department of Commerce's National Technical Information Service (NTIS). These data have been used extensively in evaluating public policies and economic, social, educational, and regulatory programs relevant to food consumption and nutrition.

This report provides data on the food consumption of households in a week for more than 400 food groups and items for the year, April 1977 through March 1978, and by four seasons--spring, summer, and fall of 1977 and winter of 1978. Information includes quantity and money value of foods, and the percentage of households using those foods during a week. Household data for these measures are classified by urbanization and by region (see NFCS 1977-78 Reports No. H-7 through H-10). Consumption measures for the year are further subdivided by household income (14 categories). For the spring only, comparable information based on a limited number of income subcategories is available for the United States and four regions (see NFCS 1977-78 Reports No. H-1 through H-5).

[1] See "Table Notes"

TABLE NOTES

The following notes are for tables 2-25. They provide the type of information usually found at the end of individual tables. "General Notes" contain information and explanations applicable to all or most tables. "Specific Notes" refer to a particular table, group of columns, or single column of a table.

General Notes

1. Average quantity and money value per household and percentage of households are based on all households in the cell. See table 1 for cell counts.
2. Component items may not cross-add to totals because of rounding.
3. The asterisk (*) indicates some but less than 0.005 pound, 0.005 dollar, or 0.05 percent.
4. See table 3 for food group totals for tables 4-22.
5. Homemade mixtures on hand at the beginning of the 7-day period if used during the survey week are included in prepared form rather than as ingredients. Data for all other foods are as they were brought into the kitchen. See "Definitions and Explanations," Food at Home.
6. Food from Meals on Wheels and similar programs that provide food in the home are included in tables 3-22.
7. Commercially canned food includes baby food. See table 23 for separate data on baby food.
8. Food substitutes are included in the group of foods they replace.
9. Lists of foods in the "Specific Notes" are not necessarily all-inclusive.
10. Mention of a trade name does not constitute an endorsement of the product by the U.S. Department of Agriculture over other products not mentioned.

Specific Notes

Table 2.--Money value of food by source

Includes money value of alcoholic and other beverages.

Col. No.	Heading	Notes
2....	Household size (number).............	In equivalent persons; 21 meals at home equal 1 person. See "Definitions and Explanations," Household Size.
3-5..	Households reporting (percent)......	All households reported expenditures for food used at home; therefore, the percent of households reporting food in columns 3, 4, and 5 (100.0) has been omitted.
6....	Not bought, total...................	Including money value of food received from Meals on Wheels and similar programs.
4-8..	At home.............................	Including money value of packed lunches and other food carried from home. See "Definitions and Explanations," Money Value of Food Used at Home.
11...	Bought, snacks......................	Between-meal food and beverages; supplements to packed lunches.
12...	Meals not bought....................	See "Definitions and Explanations," Food Away From Home Not Bought.

Table 3.--Food group totals

Col. No.	Heading	Notes
	See tables 4-22 for detailed data.	
2	Milk, cream, cheese (calcium equivalent)	See "Definitions and Explanations," Calcium Equivalent.
7	Poultry, fish	Also shellfish.
8	Eggs (fresh equivalent)	See "Definitions and Explanations," Eggs: Fresh Equivalent.
11	Fresh vegetables	Other than potatoes and sweetpotatoes. Also home-canned and home-frozen.
12	Fresh fruit	Also home-canned and home-frozen.
15	Juice--vegetable, fruit (single-strength equivalent)	Single-strength equivalent of frozen concentrated juice, including fresh vegetable juice not shown separately in table 17.
16	Dried vegetables, fruit	Also home-canned and home-frozen.
18	Soups, sauces, gravies	Excluding baby and junior soups, which are included in table 22; including frozen soups not shown separately in table 20.

407-637 0 - 83 - 17 : QL 3

Table 4.--Milk, cream, cheese

Col. No.	Heading	Notes
	Fresh fluid milk:	
2....	Total	Cols. 3-8 and imitation milk.
3....	Whole	Also low sodium, concentrated, goat, filled milk.
5....	Skim, nonfat	Milk with 0.5 percent milkfat or less.
6....	Lowfat	Milk with 1-2 percent milkfat; also sweet acidophilus.
8....	Chocolate	Also chocolate milk drink, carryout-type thick shakes.
	Processed milk:	
9....	Total (calcium equivalent)	See "Definitions and Explanations," Calcium Equivalent for explanation of equivalent; cols. 10, 13, and frozen milkshakes.
10...	Canned, total	Cols. 11, 12, and soy milk, infant formula (milk, meat, soy base); diet beverages, milkshakes, chocolate milk drink.
11...	Canned, evaporated	Also goat; skim; filled milk products such as Milnot and Topic.
13...	Dry, total	Cols. 14, 15, and soy milk, infant formula (milk, soy base), diet beverages.

Table 4.--Milk, cream, cheese--Continued

Col. No.	Heading	Notes
14...	Dry milk	Lowfat, nonfat, buttermilk, whole, goat; also instant protein powder and eggnog beads.
15...	Mixtures	Malted milk, beverage mixes (cocoa, instant breakfast) containing dry milk.
	Cream:	
17...	Sweet, light	Fluid and powdered.
18...	Sweet, heavy	Fluid and whipped.
19...	Half-and-half	Sweet, sour; also eggnog.
20...	Sour	Also sour cream substitutes.
22...	Substitutes, creamers	Products such as Coffeemate, Coffee Rich.
23...	Substitutes, toppings	Products such as Cool Whip, Redi-Whip, Dream Whip.
	Frozen milk dessert:	
24...	Total	Cols. 25-27 and frozen dietary desserts, frozen yogurt.
25...	Ice cream	Also sundaes; ice cream cake or roll.
26...	Ice milk	Also frozen custard.

Table 4.--Milk, cream, cheese--Continued

Col. No.	Heading	Notes
	Cheese:	
28...	Total	Cols. 29-36 and imitation cheese.
29...	American, natural	Cheddar; also Colby, Coon, Longhorn.
30...	American, process	Cheddar; also Pimento.
31...	Swiss	Emmentaler; also Gruyere.
32...	Cottage	Also Ricotta, Bakers, Farmer's, Dutch, Pot.
33...	Cream	Also Neufchatel.
35...	Dry cheese	Parmesan, Romano, Sapsago.
36...	Other	Bel Paese, Blue, Caciocavallo, Gjetost, Gorgonzola, Liederkranz, Muenster, Mysost, Port du Salut, Stilton, Camembert, Limburger, Brick, Brie, Roquefort, Gouda, Edam, Mozzarella, Provolone.
37...	Dips	Also cheese balls.

Table 5.--Fats, oils

Col. No.	Heading	Notes
	Table fats:	
4....	Margarine, total	Cols. 5, 6, and diet imitation, reduced fat, whipped, liquid margarine; flavored spreads, half margarine and half butter.
	Cooking fats:	
8....	Animal	Lard, chicken fat, suet, bacon drippings.
9....	Vegetable	Hydrogenated fat; also compounds of vegetable and animal fats.
10...	Salad, cooking oils	Also lecithin.
	Salad dressing:	
16...	Other	Mayonnaise type, russian, Roquefort, blue, thousand island, yogurt, sour cream, sandwich spread, tartar sauce, green goddess, caesar, horseradish sauce, coleslaw dressing.

Table 6.--Flour, cereal

Col. No.	Heading	Notes
	Flour:	
3....	Wheat	White, whole-wheat, buckwheat, cake meal, gluten, low-protein.
4....	Other	Corn, rice, potato, oat, soy (flour and flakes), triticale, rye, barley, millet, peanut, cottonseed, carob, jerusalem artichoke.

Table 6.--Flour, cereal--Continued

Col. No.	Heading	Notes
	Prepared mix:	
7....	Biscuit, roll, muffin...............	Also cornbread, coffeecake, popover.
8....	Cake..............................	Including boston cream pie, cheesecake, gingerbread.
9....	Pie...............................	Piecrust mix, piecrust mix and filling; also graham cracker crust mix.
10...	Cooky.............................	Including brownie and date bar mix.
11...	Other.............................	Bread, cream puff, eclair, apple crunch, pudding cake, cruller, potato flour mixes.
	Breakfast cereal:	
17...	Hot, other........................	Corn, rice, rye.
18...	Cold, total.......................	Cols. 19-24 and dry baby cereal.
19-24	Cold..............................	Plain or presweetened, added fruit or nuts.
	Other cereal, pastes:	
26...	Rice..............................	Including rice fries.
30...	Macaroni, other pastes............	Spaghetti, noodles; corn, whole-wheat, high-protein pastes; chinese long rice, pastina.

Table 6.--Flour, cereal--Continued

Col. No.	Heading	Notes
31...	Popcorn	Popped and unpopped, with or without seasoning, oil, cheese, sugar.
32...	Cornstarch	Also tapioca, barley, buckwheat groats, bulgur, rice polishings, sorghum grits, malt, millet, potato starch.

Table 7.--Bakery products

All columns include ready-to-eat, brown-and-serve and partially baked products.

Col. No.	Heading	Notes
	Bread:	
3....	White	Including egg, cheese, italian or grecian, potato, added protein breads, salt-rising, french or vienna.
5....	Other	Rye, other grain, white and whole-wheat, cracked wheat, raisin, rice, pumpernickel, cornbread, boston brown, oatmeal, mixed grains; bread crumbs, stuffing mix, seasoned coatings for meat or poultry, bread sticks, melba toast, tortillas, zwieback.
	Other bakery products:	
7....	Crackers	Unsweetened crackers, any grain; also cracker meal, chow mein noodles.

Table 7.--Bakery products--Continued

Col. No.	Heading	Notes
9	Muffins, biscuits	Also waffles, pancakes, french toast.
10	Cake	Including cheesecake, boston cream pie, gingerbread.
11	Pie	Commercially and home-frozen fruit pies, assumed not baked. All other pies, considered baked. Also cobblers, tarts, dumplings, strudel, turnovers, piecrust, eclairs, cream puffs, french pastry.
12	Cookies	Also graham crackers, animal crackers, teething biscuits.
13	Sweet buns, coffeecake	Also danish pastry, toaster pastries, breakfast bars such as Breakfast Squares, Figurines.
15	Other baked goods, total	Cols. 16, 17, and blintzes, ice cream cones, milk product snacks such as yogurt chips.
17	Other baked goods, other grain snacks	Wheat, corn, mixed grain, rye, snacks such as Cheese Tid-Bits, Fritos, Chee-tos, Doo-Dads.

Table 7.--Bakery products--Continued

Col. No.	Heading	Notes
18...	Doughs, batters, total..............	Cols. 19-21 and piecrust (not baked), cooky, sweet roll, coffeecake, doughnut dough, chinese soft noodles, and danish pastry.
21...	Doughs, batters, biscuit, pancake, total......................	Cols. 22, 23, and muffin batter.

Table 8.--Meat

Fresh meat also includes home- and commercially frozen meat and cooked meat with cut specified. Canned meat includes baby or junior meat, home- and commercially canned and cooked meat with cut not specified.

Col. No.	Heading	Notes
	Beef:	
4....	Steak, round...........................	Including minute, cube, swiss.
6....	Steak, porterhouse..................	Also club, T-bone.
7....	Steak, other...........................	Flank, chuck, rib, plate, filet mignon, delmonico, tenderloin, and flaked and formed steaks.
9....	Roast, chuck...........................	Also brisket, california, cross-cut, pot roast, shoulder.
12...	Roast, rump............................	Also top sirloin.
13...	Stewing................................	Also boiling beef for soup.

Table 8.--Meat--Continued

Col. No.	Heading	Notes
14...	Corned, chipped, dried	Also pastrami.
15...	Ground	Including ground chuck, ground round, beef with other meat or with hydrated vegetable protein.
16...	Other, raw	Plate, shank, short ribs, oxtails, smoked beef sausage, beef bacon, stewing, boiling and soup beef with bone.
	Pork:	
24...	Fresh, (not cured or smoked), other	Boston butt, picnics, shoulder, steak, spareribs, pig feet, neckbones, fat cuts, ground pork, miscellaneous pork cuts.
26...	Cured, smoked ham	Including sliced boiled ham.
28...	Cured, smoked, salt pork	Also fresh jowls.
29...	Cured, smoked, other	Pork shoulder, picnics, boston butt, canadian bacon, sausage, pork chops, loin roast, pickled pork products, pork breakfast strips, hocks, pork loin roll, spareribs, miscellaneous pork cuts.
30...	Canned, cooked	Including ham, bacon, sausage, cracklings, pork skins, spareribs, miscellaneous pork cuts.

Table 8.--Meat--Continued

Col. No.	Heading	Notes
	Veal:	
31...	Total................................	Cols. 32-34 and canned and cooked veal.
34...	Stewing, ground......................	Also breast, plate, shank, patties, riblets, mock "chicken" legs, veal for soup.
	Lamb:	
35..	Total................................	Cols. 36-38 and canned and cooked lamb.
38...	Stewing, ground......................	Also breast, shank, patties, lamb for soup, riblets, lamb head.
	Variety meat:	
39...	Total................................	Cols. 40, 41, and game.
40...	Liver................................	Including canned and cooked liver.
41...	Other................................	Brains, chitterlings, tripe, gizzard, heart, kidney, tongue, lungs, sweetbreads, including canned and cooked.
	Lunch meat:	
43...	Frankfurters.........................	Including frankfurters made from poultry; canned frankfurters.
45...	Other, canned........................	Also refrigerated meat spread.

Table 8.--Meat--Continued

Col. No.	Heading	Notes
	Meat substitutes:	
48...	Substitutes..........................	Products such as Loma Linda Vegeburger, Morningstar Breakfast Strips; also meal supplements and replacements such as Ensure liquid nutrition, liquid protein.
49...	Extenders............................	Textured vegetable protein.

Table 9.--Poultry, fish

Col. No.	Heading	Notes
	Poultry:	
2-5...	....	Including fresh, frozen, canned, cooked.
5....	Other..................................	Cornish game hen, duck, goose, guinea hen, pheasant, quail, squab, other game birds.
	Fish, shellfish:	
8....	Fish, fresh, frozen..................	Also cooked.
9....	Fish, smoked, dried..................	Also salted, cured, pickled; kippered herring.
11...	Fish, canned.........................	Salmon, sardines, mackerel, caviar, anchovies, gefilte fish, roe, herring, fish flakes, sturgeon.
12...	Shellfish............................	Including canned, frozen, cooked, dried; also frog legs, turtle.

Table 10.--Eggs

Col. No.	Heading	Notes
2....	Total (fresh equivalent)	See "Definitions and Explanations," Eggs: Fresh Equivalent. Cols. 3-7, cooked, and in-shell equivalent of liquid eggs (yolks, whites, yolks and whites mixed).
	Fresh, in shell:	
3....	Small	Also peewee, pullet.
6....	Extra large	Also jumbo.
	Processed:	
8....	Total (fresh equivalent)	See "Definitions and Explanations," Eggs: Fresh Equivalent. Col. 9 and processed eggs.
9....	Substitutes	Liquid, powdered and frozen products such as Second Nature, Egg Beaters, Eggstra.

Table 11.--Sugar, sweets

	Sugar:	
2....	Total	Cols. 3-7 and maple, infant formula sugars.
5....	White, powdered	Including confectioners'.
6....	Brown	Including unrefined sugar, turbinado natural sugar, sugar in the raw.

Table 11.--Sugar, sweets--Continued

Col. No.	Heading	Notes
7....	Substitutes..........................	Including brown and white sugar replacements such as Sugar Twin.
	Sirup, molasses, honey:	
9....	Sirup, total.........................	Cols. 10, 11, and sorghum, cola, fruit, and dietetic sirups.
10...	Sirup, corn, cane....................	Also blends of corn and cane.
11...	Sirup, maple.........................	Also blends with maple.
	Jelly, jam:	
14-16	....	Including home- and commercially preserved.
16...	Jam, fruit butter....................	Also preserves, marmalade, fruit topping, pastry filling.
	Candy, topping:	
17...	Total................................	Cols. 18-21 and diet candy.
21...	Without nuts, no chocolate..........	Also candied fruits, peels; food sticks.
	Miscellaneous sweets:	
22...	Total................................	Cols. 23-26 and fruit pectin, junket tablets, meringue shells.

Table 12.--Potatoes, sweetpotatoes

Col. No.	Heading	Notes
	Fresh:	
2....	Total	Cols. 3, 4, and yams.
3....	White	Also home-canned and home-frozen.
4....	Sweetpotatoes	Also home-canned, home-frozen, cooked.
	Commercially canned:	
5....	Total	Cols. 6, 7, and yams.
	Commercially frozen:	
11...	White, other	Mashed, baked, scalloped, puffs, cottage fries, hash browns, potatoes with additions, potato pancakes.
13...	Dried	Also potato pancake mix, yams.
14...	Chips, sticks	Including extruded and artificially shaped chips.
15...	Salad, other cooked	Including carryout french fries, potatoes with additions.

Table 13.--Fresh vegetables

All columns also include home-canned, home-frozen, and cooked vegetables.

Col. No.	Heading	Notes
	Dark green:	
8....	Leafy, other	Chard, cress, endive, parsley; beet, turnip, radish, and wild greens.
14...	Tomatoes	Also tomato aspic, ready-to-eat.

Table 13.--Fresh vegetables--Continued

Col. No.	Heading	Notes
	Other green:	
22...	Peas	Green or english, cow, field, black-eyed, snowpeas, chickpeas, garbanzos, pigeon peas.
23...	Other	French or globe artichokes, brussels sprouts, green soybeans, bean curd.
	Other vegetables:	
27-28	Onions	Also garlic, chives, scallions, leeks.
33...	Other	Eggplant, horseradish, kohlrabi, alfalfa sprouts, bean sprouts, mixed vegetables for salad or soup, mushrooms, parsnips, radishes, rutabagas, sauerkraut, succotash, summer squash.

Table 14.--Fresh fruit

All columns also include home-canned, home-frozen, and cooked fruit.

Col. No.	Heading	Notes
	Citrus:	
6....	Other	Tangerines, kumquats, tangelos, temple oranges, fresh citrus segments, mixed citrus fruit basket.
	Other vitamin C rich:	
7....	Total	Cols. 8, 9, and currants, acerola cherries, mango, guava, persimmons.

Table 14.--Fresh fruit--Continued

Col. No.	Heading	Notes
8....	Cantaloup.............................	Also muskmelon, persian, crenshaw melon, papaya.
	Other:	
10...	Total.................................	Cols. 11-23 and figs, dates, pomegranates, mixed fruit.
12...	Bananas...............................	Also plantains.
15...	Melons except cantaloup............	Watermelon, casaba, honeydew, mixed melon balls.
18...	Apricots..............................	Also nectarines, loquats.

Table 15.--Commercially canned vegetables, fruit

Fruit columns include fruit for pie filling.

Col. No.	Heading	Notes
	Vegetables:	
3....	Dark green...........................	Collards, spinach, kale, salad greens, chard, mustard, turnip, beet greens, cress, pimientos, peppers.
4....	Deep yellow..........................	Carrots, carrots and peas, pumpkin, winter squash.
5....	Tomatoes.............................	Also aspic, paste, puree, sauce, and tomatoes with vegetables.

Table 15.--Commercially canned vegetables, fruit--Continued

Col. No.	Heading	Notes
	Other vegetables:	
8....	Baked beans........................	Also mature beans and peas, lentils; bean curd, paste.
10...	Snap beans.........................	Green, wax or yellow, shellie beans.
11...	Beets..............................	Including pickled beets, beets and greens.
12...	Corn...............................	Also large hominy.
13...	Green peas.........................	Also immature field, cowpeas, and black-eyed peas; snowpeas, green pigeon peas.
15...	Other..............................	Chinese vegetables, horseradish, mixed vegetables, mushrooms, onions, okra, squash, succotash, artichokes.
16...	Dietary pack.......................	Including only items specifically labeled as diet.
	Fruit:	
18...	Citrus.............................	Citrus segments, kumquats, tangerines.
28...	Other..............................	Avocado, figs, grapes, plums, bananas, dates, prunes, mangoes, persimmons.
29...	Dietary pack.......................	Including only items specifically labeled as diet.

Table 16.--Commercially frozen vegetables, fruit

All vegetable columns include vegetables with sauce, nuts, mushrooms or other additions.

Col. No.	Heading	Notes
	Vegetables:	
3....	Dark green, total....................	Cols. 4, 5, and peppers.
4....	Dark green, leafy....................	Collards, spinach, chard, kale, parsley, mustard, and turnip greens.
6....	Deep yellow..........................	Carrots, carrots and peas, squash, pumpkin.
10...	Other vegetables, snap beans........	Green, wax or yellow; also italian, broad beans.
11...	Other vegetables, green peas........	Also black-eyed peas, cowpeas, edible podded peas.
14...	Other vegetable, other..............	Brussels sprouts, cauliflower, okra, onions, dry beans, mushrooms, eggplant, summer squash, succotash, beets.
	Fruit:	
15...	Total...............................	Cols. 16, 17, and citrus segments.
17...	Other...............................	Apples, apricots, blackberries, blueberries, cherries, cranberries, melon balls, mixed fruit, peaches, pineapple, raspberries, rhubarb, bananas.

Table 17.--Juice--Vegetable, fruit

Col. No.	Heading	Notes
	Vegetable, canned:	
4....	Other	Carrot, mixed vegetable, sauerkraut.
	Vegetable, frozen:	
5....		Commercially frozen--concentrated; home-frozen--single strength.
	Fruit, canned:	
10...	Citrus, other	Lemon, lime, tangerine, blends of citrus with or without noncitrus.
12...	Noncitrus, apple, cider	Also blends with apple.
15...	Noncitrus, other	Prune, fig, blackberry, papaya, apricot-pineapple.
	Fruit, frozen:	
16-21		Commercially frozen--concentrated; home-frozen--single strength.
19...	Citrus, other	Grapefruit, lemon, lime, tangerine, blends of citrus with or without noncitrus.
20...	Noncitrus, total	Col. 21 and apple, cider, pineapple.
	Fruit, fresh:	
22...	Total	Col. 23 and apple, prune, grape.
23...	Citrus	Also blends of citrus with or without noncitrus.

Table 18.--Dried vegetables, fruit

All columns include home-dried and commercially dried vegetables and fruit. Canned, frozen, and cooked dried items are also included except for commercially canned dry beans and peas (table 15).

Col. No.	Heading	Notes
	Vegetables:	
2....	Total..................................	Cols. 3, 4, and other dried vegetables.
	Fruit:	
7....	Raisins................................	Also currants.
8....	Other..................................	Apples, apricots, cherries, dates, figs, peaches, pears, mixed fruit, berries.

Table 19.--Beverages

Col. No.	Heading	Notes
	Coffee:	
2....	Total..................................	Cols. 3-5 and liquid concentrate, dry coffee mix such as Cafe Francais, Swiss Mocha.
3....	Bean, ground...........................	Also coffee mixed with chicory or wheat such as Luzianne and Mellow Roast.
4....	Instant................................	Also coffee mixed with chicory such as Sunrise.
5....	Substitutes............................	Products such as Postum, Pero, chicory.

Table 19.--Beverages--Continued

Col. No.	Heading	Notes
10...	Cocoa, chocolate	Including cocoa without dry milk; baking chocolate; chocolate sirup or topping.
	Soft drink:	
11...	Total	Cols. 12-14 and ginger ale, quinine water, root beer, club soda.
14...	Diet	Products reported as low-calorie or dietetic.
	Fruit ade, drink, punch, nectar:	
15-20		Also nonalcoholic cocktail mix.
18...	Concentrated, frozen	Including imitation breakfast drinks such as Awake, Bright and Early, and Orange Plus.
19...	Powdered, tablet, with sugar	Including imitation breakfast drinks such as Tang and Start.
20...	Powdered, tablet, without sugar	Including artificially sweetened.
	Alcoholic beverage:	
23...	Whisky, gin, rum	Also vodka.
24...	Wine	Including champagne, sangria, vermouth; also ready-mixed cocktails.
25...	Brandy, liqueur	Including cordials, fruit brandy; also tequila.

Table 20.--Soups, sauces, gravies

Col. No.	Heading	Notes
	Ready-to-serve:	
2....	Total................................	Col. 3 and all other ready-to-serve soups. Including commercially canned, home-canned, home-frozen, and cooked.
3....	Mostly meat..........................	Also mostly poultry, fish, or legume.
	Condensed, semi-condensed:	
4....	Total................................	Cols. 5-9 and soups mostly milk or milk products such as cream soups other than mushroom or potato.
5....	Mostly grain.........................	Including soups with noodles or rice.
6....	Mostly meat..........................	Also soups mostly poultry, fish, or legume.
8....	Tomato...............................	Including gazpacho, tomato rice.
9....	Mostly other vegetable...............	Including vegetable, minestrone, onion, potato, cabbage, vegetable with beef or poultry.
	Dry, dehydrated:	
10...	Total................................	Cols. 11-13 and mushroom, tomato and soups mostly milk or milk products.
11...	Mostly grain.........................	Including soups with noodles or rice.

Table 20.--Soups, sauces, gravies--Continued

Col. No.	Heading	Notes
12...	Mostly meat...........................	Also soups mostly poultry, fish or legume; bouillon cubes, granules, powder.
13...	Mostly other vegetable..............	Green pea, onion, vegetable, minestrone, potato soups. Also seasoning mix.

Table 21.--Nuts, condiments, leavenings

Col. No.	Heading	Notes
	Nuts, peanut butter:	
3....	Nuts, total (shelled wt.)...........	Cols. 4-8 and soy nuts, nut substitute and coconut milk.
6-8..	Other nuts............................	Also pumpkin, squash, and sunflower seeds.
9....	Peanut butter.........................	Also peanut spread and other nut butter.
	Condiments:	
10-17	....	Including home-prepared and commercially prepared.
11...	Catsup, chili sauce..................	Also cocktail sauce.
12...	Barbecue sauce........................	Also spaghetti sauce, pizza sauce, hot enchilada sauce.
13...	Tomato relish.........................	Also tomato pickles.
	Leavenings:	
19...	Yeast.................................	Also brewer's powdered.

Table 22.--Mixtures, baby food mixtures

Col. No.	Heading	Notes
	Ready-to-eat:	
2	Total	Cols. 3-6 and mixtures mostly milk, milk products.
5	Mostly poultry, fish	Also egg or legume.
	Canned or frozen:	
7	Total	Cols. 8-11 and mixtures mostly milk, milk products.
10	Mostly poultry, fish	Also egg or legume.
15	Baby food mixtures	Products such as milk and fruit puddings; vegetables with meat, cereal, egg.

Table 23.--Baby food

Col. No.	Heading	Notes
	Commercially canned:	
6	Vegetables	Including vegetable soup, sweetpotatoes.
7	Fruit	Including fruit with tapioca.
9	Mixtures, total	Cols. 10-13 and mixtures mostly milk, poultry, fish, egg, or legume.

Table 23.--Baby food--Continued

Col. No.	Heading	Notes
14...	Cereal................................	Dry only; canned cereals with fruit or egg are included with mixtures.
15...	Teething biscuit.....................	Also baby cookies, pretzels.

Table 24.--Money value of all food at home per person per week

Col. No.	Heading	Notes
2....	Average (dollars)....................	Money value per person calculated using population ratio procedure--aggregate value for all households divided by aggregate number of persons in all households.

Table 25.--Seasonal indexes for selected food groups based on year and spring averages

Col. No.	Heading	Notes
4-7..	Year average = 100..................	Household average for each season divided by average for year.
8-11.	Spring average = 100................	Household average for each season divided by average for spring.

COMPARISON WITH 1965-66 HOUSEHOLD FOOD CONSUMPTION SURVEY

Although methods used in the Nationwide Food Consumption Survey 1977-78 were generally the same as those used in the 1965-66 Household Food Consumption Survey, some changes were made that might affect comparability:

--Households received advance notice of the interview for the 1977-78 survey and were asked to keep notes on food used for the 7-day period preceding the interview. In 1965-66, households were interviewed at the time of initial contact.

--Households were offered a nonmonetary incentive for participating in the 1977-78 survey. None was offered in the earlier survey.

--In 1977-78, data were collected from all households. In the earlier survey, data were collected from "housekeeping" households only (households in which 1 person had 10 or more meals at home). Data in this report are for "housekeeping" households only.

--In 1977-78, households from which data were collected in the spring (3,473-weighted) comprised about one-fourth of the total survey of housekeeping households for the year; in 1965-66, spring accounted for about one-half (6,174-weighted).

--Separate data on the quantity of donated food received and on the percentage of households participating in the Food Distribution Program were not obtained in 1977-78, since food distribution to families had been almost completely discontinued. This information was requested and tabulated in 1965-66.

--In 1977-78, data on seasonings purchased during the week were collected but not tabulated. In 1965-66, those data were both collected and tabulated.

--Income data for 1977-78 included the income of all household members age 14 and older (except roomers, boarders, and employees). In 1965-66, income data included only all related persons living in the household whom the respondent considered as part of the family's financial matters.

--In 1977-78, specific income data were collected. In 1965-66, respondents indicated which 1 of 14 income classes corresponded most closely to their family's income after taxes.

Schedule Modification

The 1977-78 schedule followed essentially the same format as the schedule used in 1965-66. Respondents, however, were asked more detailed questions on the social and economic characteristics of the household in 1977-78. They also were asked a few additional questions related to food consumption. Information about the following additional factors was collected in 1977-78:

--Education and employment of the male head of the household and occupation of both the male and female household heads.

--Amount of the last month's income from specified sources for each household member age 14 and older (except roomers, boarders, and employees) and the amount of last year's income both before and after taxes.

Table 26.--Quantity of home food used per person in a week, year 1965-66 and 1977-78, United States

Food groups and selected items	Quantity (pounds) 1965-66	Quantity (pounds) 1977-78	Percent change

---

[1] Less than 0.5 percent but more than 0.

[2] The 1965 data include purchases of tea during the survey week. The 1977 data include quantities of tea used during the survey week.

- --Participation in and eligibility for participation in the Food Stamp Program, Supplemental Food Program for Women, Infants, and Children (WIC), National School Lunch and School Breakfast Programs, and elderly feeding programs.

- --Food shopping practices.

- --For each food item used, the quantity bought and the price paid for that quantity.

Changes in Groupings of Food Items in 1977-78

- --Miscellaneous sweets (fruit ices, gelatin, icing mixes, pudding, and pudding mixes) are grouped with sugars and sweets. They were with mixtures in 1965-66.

- --Soups, sauces, and gravies are now considered a separate food group. They were with mixtures in 1965-66.

- --Commercially canned diet vegetables and fruits are shown separately. They were included with the specific commercially canned item in 1965-66.

- --Mixed-grain cold cereals are shown separately. They were included with the grain listed on the label as the first ingredient in 1965-66.

- --Batters and doughs are shown separately. They were included with the ready-to-eat baked items in 1965-66.

- --Sugar substitutes (quantity used) are grouped with sugars and sweets. Purchases of sugar substitutes during the week were with seasonings in 1965-66.

- --Iced tea mixes, with and without sugar, are grouped with tea. They were with ades and punches in 1965-66.

- --Use of tea (quantity) is shown. Purchases were shown in 1965-66.

- --All kinds of ground beef are grouped together. Specified cuts of beef that were used ground were with the specified cut in 1965-66.

- --Mixtures are categorized by the way in which they were processed--ready-to-eat, canned, frozen, or dried. They were designated by the predominant food in the mixture in 1965-66--mostly meat, mostly grain, mostly vegetable, mostly fruit, mostly milk products.

Data Tabulation

- --The 1977-78 data are classified by the 1976 or 1977 income before taxes. The 1965 66 data were classified by the 1964 or 1965 money income after taxes.

- --The 1977-78 urbanization categories are central city, suburban, and nonmetropolitan. Definitions are based on the size of the place in which the residence was located and for metropolitan households, the location within a standard metropolitan statistical area (SMSA). In 1965-66, urbanization categories used for tabulating data were urban, rural nonfarm, and rural farm. Definitions were based on the size of place in which the dwelling was located and the presence of a farm operator for rural households.

BEST COPY AVAILABLE

For comparison purposes, data from the two surveys for the United States are listed below:

	1965-66	1977-78
Median income before taxes......dollars.	---	12,000
Household size..................persons.	3.27	2.76
Money value of food per person..dollars.	10.68	21.94
At home.........................do....	8.77	16.98
Bought........................do....	8.12	15.72
Home-produced.................do....	.43	.71
Other.........................do....	.23	.55
Away from home..................do....	1.91	4.96
BLS Consumer Price Index, U.S. city average (1967=100.0), food at home (April through March).................	96.9	194.0

The number of members and the proportion of meals households had from home food supplies differed for the two periods. Therefore, the values above are given per equivalent person (1 person=21 meals at home per week).

SAMPLE ANALYSIS

Description of the Sample

Information for the Nationwide Food Consumption Survey 1977-78 was collected from 14,930 households of 1 or more members. The households were from a statistically selected sample of all private households in the 48 conterminous States, stratified by region, urbanization, and geographic or demographic similarities. Excluded from these reports are about 6 percent, or 900 households that were not housekeeping--no member ate 10 or more meals from the household food supply during the 7 days preceding the interview.

Design

This survey was designed to provide a self-weighting, multistage, stratified area sample of 15,000 households in the conterminous States. During each quarter, information was to be obtained from 3,750 households sampled by use of an interpenetrating design (spring quarter was implemented in April, May, and June 1977; summer in July, August, and September; fall in October, November, and December; and winter in January, February, and March 1978). The sampling frame was organized by use of the 1970 Census of Population and Housing.

Stratification

The 48 conterminous States were divided into 114 strata on the basis of 3 levels of stratifications--geographic division, urbanization or zone, and demographic or other geographic similarities. Each of the nine Census geographic divisions that comprise the four Census regions (see tabulation) was divided into the three Census zones defined below:

> Zone I (Central city)--the area comprised of the central city or cities (a city named in the metropolitan area title) in standard metropolitan statistical areas (SMSA);
>
> Zone II (Suburban)--the area in SMSA's outside Zone I;
>
> Zone III (Nonmetropolitan)--any area not included in Zones I and II.

Then, the two levels of division and zone were grouped at the third level based on cities or other political entities, economic trading areas, geographic units, and/or by size. This procedure resulted in 114 homogeneous strata of approximately 600,000 households each. The distribution of these strata by Census geographic divisions and zones is shown below:

Census region and division	Central city Zone I	Suburban Zone II	Nonmetropolitan Zone III	Division
	Number of strata			
Northeast:				
New England.......	2	3	2	7
Middle Atlantic...	8	9	4	21
North Central:				
East North Central	8	8	6	22
West North Central	2	2	5	9
South:				
South Atlantic....	4	6	7	17
East South Central	2	1	4	7
West South Central	4	2	5	11
West:				
Mountain..........	2	1	2	5
Pacific...........	6	7	2	15
Total.............	38	39	37	114

Primary Sampling Units

Every stratum was divided into one or more primary sampling units (PSU's). Each PSU was formed from cities, parts of cities, or from counties, and contained at least 10,000 housing units. Twelve strata were represented by only one PSU each, and these were picked with certainty.[1] From the other 102 strata, PSU's were drawn with probabilities proportional to size.

Selection of Area Segments within PSU's

Each PSU drawn was divided into small clusters of housing units called "area segments." The segments were designed, based on the 1970 Census, to contain 100 or more housing units and usually consisted of 1 or more city blocks in urban areas and part of a Census Enumeration District elsewhere. From the PSU's, 2,550 segments were drawn; the number of segments in a PSU was proportional to the size of the stratum in which the PSU was located. The probability that an individual segment would be drawn from a PSU was proportional to the ratio of the number of housing units in the segment to the total number of units in the PSU.

Prelisting of Area Segments

All 2,550 area segments were prelisted to determine the number of occupied housing units. Then, the national increase in the number of housing units from 1970 to 1977 was estimated. This information, together with estimates of occupancy and completion rates, permitted calculation of sampling ratios for the area segments that would yield a total of 3,750 households per quarter.

---

[1] Cook Co., IL; Kings Co., NY; Los Angeles Co., CA (double strata); New York Co., NY; Queens Co., NY; Chicago, IL (double strata); Detroit, MI; Los Angeles, CA (double strata); Philadelphia, PA.

Selection of Sample Housing Units

For the first two quarters, an average sampling ratio of 2.3 households per segment was used. The housing units were ordered within their respective segments. For each quarter, a sample was systematically selected from each segment, without replacement, after a random start. By the end of the second quarter, the estimated completion rate had been adjusted, and an average sampling ratio of 2.86 households per segment was used for the last two quarters. With the above adjustments, the target of responses from 15,000 households was closely approximated during the year-long survey period.

Weights

Although this survey was designed to be self-weighting, it was determined after the survey ended that the completion rates for the various PSU's differed at a statistically significant level. Therefore, weighting factors were applied to data from completed schedules. The weights were calculated for each quarter for every PSU. The weights were designed to be proportional to the ratio of the expected number of completed schedules in a PSU to the collected number of completed schedules in a PSU; weights were scaled so that there would be 3,740 completed schedules per quarter. After weighting was completed, a few household schedules had to be discarded because of invalid or incomplete data. The following tabulation gives the weighted and unweighted household counts by season, including nonhousekeeping households:

Quarter	Weighted count	Unweighted count
Spring...........	3,739	3,322
Summer...........	3,728	3,468
Fall.............	3,728	4,071
Winter...........	3,731	4,069
Total..........	14,926	14,930

Collection Counts, Year 1977-78

The following are the weighted and unweighted counts of the surveyed households, including nonhousekeeping households, distributed by geographic division and urbanization:

[1] Parts may not total to whole because of rounding.

CHARACTERISTICS OF HOUSEHOLDS

Information was collected on the household characteristics believed to be related to food consumption and dietary levels of households. Data included urbanization, region, and tenancy of residents; income, number of people living in household, and age of head; race of respondent; recipients of food stamps; frequency of major food shopping occasions; self-evaluation of food consumed by the household; classification of household by type of head; and age of male and female heads of the household. Race of the respondent was recorded as observed by the interviewer; urbanization and region were determined by the location of residence; and other characteristics were reported to the interviewer by the household respondent.

Although the data were collected for all surveyed households, table 27 displays the percent distributions for housekeeping households only, those with at least 1 person having 10 or more meals from household food supplies during the week prior to the interview. Also averages are shown for income before taxes, number of members living in the household (excluding roomers, boarders, and employees), age of head, and age of male and female heads.

[1] Housekeeping households only: Households with at least 1 person having 10 or more meals from household food supply during 7 days preceding interview.

[2] Parts may not total to the whole because of rounding.

[3] Households not classified by income are mainly those not providing requested data and those that were not household units in the previous year. These households are excluded from percent distribution but shown in parentheses as percent total.

[4] Some households did not answer the specific question, or the question was not applicable to that household.

[5] Less than 0.5 percent but more than 0.

[6] In jointly-headed households, age of the male head only.

MEAN VALUES AND STANDARD ERRORS OF FOOD GROUPS AND SELECTED ITEMS

The average (mean) values in this report are based on data for households from the sample and hence may differ somewhat from the figures that would have been obtained if data had been taken from all U.S. households by use of the same questionnaire, interviewer, and coder. Sample surveys are subject to two types of errors--nonsampling and sampling.

Nonsampling errors can be attributed to many sources: Inability to obtain information about all cases; definitional difficulties; differences in interpretation of the question; inability or unwillingness of the respondents to provide correct information; errors in recording or coding the data; and other errors of collection, response, processing, coverage, and estimation of missing information. Because of the number of possible sources of error, measurement of the total nonsampling error is very difficult.

Although the respondents in this survey were asked to give the prices of the food items that were originally bought, the prices for those items reported as home-produced and as gift or pay were not asked. Instead, the money values for food items received without direct expense were based on the average (mean) price per pound paid for comparable foods by surveyed households in the same region and season. Imputations of this sort may have contributed further to nonsampling error.

Sampling errors occur by chance because a sample rather than the entire population was surveyed. The standard error estimates the precision with which a mean value from a sample approximates the difference between the sample data and the data that would have been obtained from the entire population. Furthermore, the standard error partially reflects the variation in the estimates from some nonsampling errors, but it does not measure per se, any systematic biases in the data. In effect, standard error measures sampling and random nonsampling errors. The sample estimates and their estimated errors enable one to construct confidence intervals or ranges that would include the average result of all possible samples with a known probability. The procedure, as illustrated below, provides a method to construct interval estimates so that a known proportion of the intervals would contain the average of all possible samples. For example, if all possible samples were selected, each of these was surveyed under essentially the same general conditions, and an estimate and its estimated standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from 1 standard error below the estimate to 1 standard error above the estimate would include the average result of all possible samples.

2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.

3. Approximately 95 percent of the intervals from 2 standard errors below the estimate to 2 standard errors above the estimate would include the average result of all possible samples.

The average result of all possible samples either is or is not contained in any particular computed interval. For a particular sample, however, the average result of all possible samples is included, with specific confidence, in the constructed interval. For example, the mean money value per household in the United States for the meat group was $12.30 for the year and its corresponding standard error was $0.17. This means that the 68-percent confidence interval around $12.30 is from $12.13 to $12.47. It can, therefore, be asserted at a 68-percent level of confidence that the sample mean of $12.30 will differ by less than plus or minus $0.17 from the mean for a complete population. At a 95-percent level of confidence, it will differ by less than plus or minus $0.34.

DEFINITIONS AND EXPLANATIONS

All Urbanizations

Includes all households in central city, suburban, and nonmetropolitan areas. See "Urbanization."

Bought Food - See "Source of Food."

Calcium Equivalent

The quantity of whole fluid milk to which the various dairy products (excluding butter) and nondairy products containing milk derivatives are equivalent in calcium content. The chief source of data on the calcium content of the various dairy products was "Composition of Foods: Dairy and Egg Products; Raw, Processed, Prepared," U.S. Department of Agriculture, Agriculture Handbook No. 8-1, November 1976.

Central City - See "Urbanization."

Eggs: Fresh Equivalent

The quantity of fresh eggs plus frozen, dried, or liquid eggs without shell (whether the whole egg, whites, or yolks only), and of cooked eggs or substitutes converted to the weight of equivalent eggs in shell. The source of most factors was "Conversion Factors and Weights and Measures for Agricultural Commodities and Their Products," U.S. Department of Agriculture, Statistical Bulletin No. 362, June 1965.

Food at Home

Food and beverages (alcoholic and nonalcoholic) from the household food supplies "used" during the 7 days before the date of the survey interview, whether bought or received without direct expense. This included food and beverages eaten at home, carried from the home in packed meals, thrown away, or fed to pets. Food fed to animals raised for commercial purposes and commercial "pet" food were omitted. Food that was obtained with cash, credit, or food stamps, and food that was home-produced, received as a gift or payment for goods and services, or received through Federal assistance programs or from welfare agencies was included.

Any food from the respondent's household that was given away for use outside the home, such as food sent to friends and relatives, gifts of food donated to church suppers, and food given to household help to take home, was not considered as food used by the household.

Food used at home was classified as fresh, commercially canned or frozen, home-canned or -frozen, already cooked, and dried. Generally, food used at home was reported in the form brought into the kitchen.

Homemade mixtures used during the week were reported either as ingredients if prepared during the week or as the product, if prepared before the survey week. For example, a homemade cake prepared any time within the survey week was included with quantities of flour, eggs, sugar, fat, and milk. But a homemade mixture used during, but prepared before, the survey week was recorded in the name of the product in the same way as a commercially prepared mixture was recorded. To illustrate, a cake that was prepared at home on any day before the survey week, or a bakery cake that was brought from the store into the kitchen, was entered on the schedule as a ready-to-eat cake.

If home-canned or home-frozen vegetables and fruit and home-preserved jelly, jam, pickles, or relish were processed before the survey week, they were also recorded in the same way as commercially prepared mixtures. However, when the canned, frozen, or preserved food was made at home during the 7-day period, only the ingredients of the portion used during that period were recorded.

Regardless of the time of preparation, homemade butter, cheese, cream, and buttermilk were always reported as the products rather than as ingredients.

Food at Home Not Bought

Food used at home that was home-produced or received as a gift or instead of pay. See "Source of Food."

Food Away From Home

Any food and beverages (alcoholic and nonalcoholic) in meals and snacks purchased by the household for themselves and their guests away from home during the week. The expense for such food and beverages included sales tax and tips. Food eaten by the household in other homes or elsewhere as guests or employees for which no household expense was involved was not included in expense for food away from home. See "Food Away From Home Not Bought."

Food Away From Home Not Bought

The number of meals with no expense to the household, that is, meals eaten by household members in other homes or elsewhere as guests or employees.

Home-Produced Food - See "Source of Food."

Household

A household consists of all the persons who occupy a house, an apartment, or other group of rooms, or a room that constitutes a housing unit. The survey does not cover group quarters, such as rooming houses, military barracks, and institutions.

Housekeeping Households

Those households with at least 1 person having 10 or more meals from the household food supply during 7 days before the interview. Data for nonhousekeeping households were collected but are not presented here.

Household Size

The total number of meals served to all persons in the household from home food supplies divided by 21 (based on 3 meals a day for 7 days for 1 person) to obtain the household size in equivalent persons. When meals reported eaten at home and away from home did not add to 21 meals for each person, the skipped meals were distributed as bought, free, and from household food supplies in the same proportion as the reported meals. The count of equivalent persons was not reduced in those households where members omitted meals nor was it increased for refreshments between meals. However, the meals served to guests, boarders, and employees were included.

Lunches carried from home, but supplemented by other food purchased, received as gift, or received instead of pay, were counted as one-half meal at home and one-half meal from one of the other sources; lunches supplemented only by beverages were counted as full meals at home.

Refreshments served to guests were also counted in the total meals from household food supplies, but were not given the same value as a full meal. Servings of a single food or two (for example, a glass of milk or a cup of coffee and a doughnut) were considered light refreshments and counted as one-fourth meal for each guest. More than two refreshment items served at one time, such as ice cream, cake, and coffee, were counted as one-half meal for each guest. Any refreshments served to persons who were part of the household were not counted unless they substituted for a regular meal.

Money Income Before Taxes

Respondent's estimate of the household's money income for the previous year from all sources before the deduction of State and Federal income taxes. Households interviewed in spring, summer, and fall gave 1976 income; those interviewed in winter gave 1977 income. Income was counted for all household members (excluding roomers, boarders, and employees) whether or not they ate at home during the week.

Money Value of Food Used at Home

Expenditures for bought food and money value of home-produced food and food received free of cost that was used during the survey week. Expenditures for bought food were based on prices reported as paid regardless of the time of purchase. Sales tax was excluded. Bought food with unreported prices, food produced at home, and food received as a gift or instead of pay were valued at the average price per pound paid for comparable food by survey households in the same region and season.

Nonmetropolitan - See "Urbanization."

Not Classified by Income

Households that were not household units for the previous year and households in which respondents were either unable or unwilling to give information about income.

Person

One equivalent person equals 21 meals at home in a week. Average quantities and money value of food used per person by groups of households are per 21-meal-at-home-equivalent person. See "Household Size."

Region

Those areas of the 48 conterminous States as defined by the U.S. Department of Commerce for the 1970 Census of Population. The four Census regions and their States are:

Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont;

North Central--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin;

South--Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia;

West--Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

Seasons

Surveyed seasons of the year are:
Spring--Months of April, May, and June 1977.
Summer--Months of July, August, and September 1977.
Fall--Months of October, November, and December 1977.
Winter--Months of January, February, and March 1978.

Source of Food

Classification of food used as bought, home-produced, or received as gift or instead of pay.

Bought--Food received for cash, on credit, or with Federal food coupons such as food stamps and WIC vouchers.

Home-produced--Food raised for home use and food obtained by hunting, fishing, and gathering from the wild.

Received as gift or pay--Food received as gift from persons outside the household or as payment for services rendered.

Suburban - See "Urbanization."

Survey Week

The continuous 7-day period before the survey interview during which the reported food was used. An interview that occurred on Monday morning after breakfast, for example, covered the period from Monday morning a week earlier after breakfast to the interview time.

Urbanization

Distinction of households in central city, suburban, and nonmetropolitan was based on the standard metropolitan statistical area (SMSA) as defined by the U.S. Department of Commerce in the 1970 Census of Population.

All urbanizations--Composite of central city, suburban, and nonmetropolitan households appropriately weighted.

Central city--Population of 50,000 or more and main or core city within SMSA.

Suburban--Generally within the boundaries of SMSA but not within legal limits of central city SMSA.

Nonmetropolitan--All U.S. areas not within SMSA.

Weights - See "SAMPLE ANALYSIS."

Year - See "Seasons."
